

HONDA
The Power of Dreams

BATTERIES

The **battery** starts the engine and supplies **power** to **electrical components** such as the lights and audio system, but is also used for backing up each of the **car's computers and control units**.

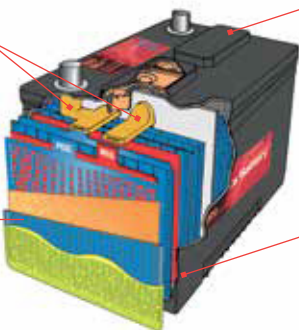

HONDA'S BATTERY CHECK, A SPECIFIC SERVICE

To be sure your battery is powerful enough, Honda recommended that a **battery test** is carried out.

With their **specialized testers**, our Honda technicians are able to judge whether a battery is degraded, or if the battery is at a low state of charge.

Patented Selenium alloy helps control acid penetration and reduces effects of corrosion

Premium polyethylene separators minimize damage caused by vibration

"Best in Class" vents specifically designed to minimize maintenance

Patented round negative plate corners help reduce internal shorts

BATTERIES

Why is it important to use Honda Genuine Batteries?

HIGH ENGINE START-UP PERFORMANCE

Honda Genuine Batteries really **improve the electrical efficiency** by special alloy plates.

Thanks to the low resistance separator, they realizes the **excellent start-up performance** even in extreme cold.

HIGH DURABILITY

60% longer durability when compared with a standard battery, ensuring a **long life**.

LONG TIME MAINTENANCE FREE

Honda Genuine Batteries **prevent overcharging and reduce the loss of electrolyte**.

They also eliminate the need of water refilling of the electrolyte for a long period of time.

VERY IMPORTANT

Always use a genuine Honda EFB battery for Idle Stop vehicles. **Never use a regular battery** as the Idle Stop system will not operate as designed and the **battery life will be adversely affected**.
