

HONDA
The Power of Dreams

BRAKE PADS BRAKE DISCS

The **brake pads** stop the rotation of **brake discs** via hydraulic pressure when the driver presses the brake pedal, causing the car to slow down or stop. Brake performance that delivers **safe driving** is required under continuous braking conditions or sudden braking. Other detailed factors are also required, including **wear resistance**, **fatigue resistance** and reduced **levels of noise and vibrations**.

HONDA SECURITY PROCESS

Honda Genuine Brake Pads are designed to generate a **specific noise** when the remaining brake pad level has become too low, **to alert the driver that replacement is required** (metallic screeching sound when pressing the brake pedal).

Inspection is recommended **at a Honda dealer** to ensure driver and passenger safety.

BRAKE PADS BRAKE DISCS

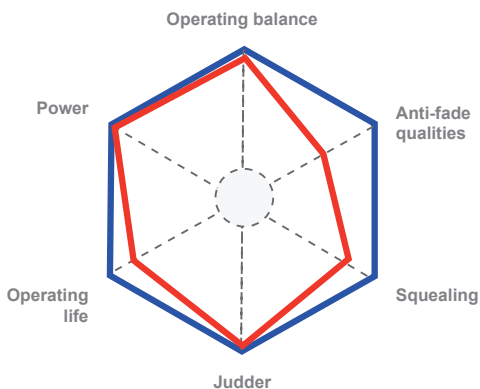

Why is it important to use Honda Genuine Brake Pads/ Brake Discs?

SAFETY

Honda Genuine Brake Pads/Brake Discs have undergone extensive testing during the car's development stages to be the **perfect fit for driver and passenger safety**.

PERFORMANCE

Using Honda Genuine Brake Pads/Brake Discs is the best way of ensuring an **optimum balance for braking performance**, including braking power, stability and durability of pads/discs. They also ensure reduced squealing and other abnormal noise.

ECO FRIENDLY

Honda Genuine Brake Pads/Brake Discs are made from environmentally-friendly, **asbestos free materials**.
