

RAPTOR™

2022

ALL-NEW 2022 BRONCO RAPTOR

Introducing the Ford Bronco Raptor™ SUV. Designed and engineered by Ford Performance to be the world's first Ultra4 Racing-inspired SUV, it's capable of boulder crawling *and* highway-speed desert-dune conquering. Ultra4 Racing is the epitome of grueling off-road competition, featuring demanding races such as the famed King of the Hammers in the Johnson Valley in California, where the Ford Bronco® SUV is the official SUV of the Ultra4 series.

RAPTOR. Code Orange. Available equipment.

Vehicle imagery throughout this brochure may be computer-generated and may include available and aftermarket equipment, and available Ford Accessories. Preproduction model shown throughout. Performed by professional driver. Always consult the Owner's Manual before off-road driving, know your terrain and trail difficulty, and use appropriate safety gear.

ENGINEERED BY FORD PERFORMANCE

THE 3.0L ECOBOOST® V6 ENGINE is paired with a 10-speed automatic transmission and specifically tuned to meet Ford Performance standards for a Raptor™ powertrain. The result is an impressive 418 horsepower^{1,2,3} and 598 Nm of torque.^{1,2} The Bronco® Raptor twin-turbo engine features a compacted graphite iron block, intercooling and air-induction systems. A true dual-exhaust system, featuring active-valve technology, uses near-equal-length pipes for an inspiring exhaust note. Drivers can alter the sound with 4 selectable exhaust modes, including Normal, Sport, Quiet and Baja.

THE TERRAIN MANAGEMENT SYSTEM™ with G.O.A.T. Modes™ (Goes Over Any Type of Terrain) offers 7 driver-selectable modes, including a Baja Mode with turbo anti-lag calibration for high-speed desert runs. The advanced 4x4 system includes a clutch designed for high-performance desert events. You also get the Raptor High-Performance, Off-Road, Stability, Suspension (HOSS) 4.0 system featuring uniquely tuned FOX™ 3.1 Internal Bypass Semi-Active Dampers with integrated reservoirs up front and remote in rear. Its sensors monitor terrain conditions hundreds of times every second and adjust suspension tuning accordingly.

RAPTOR. Code Orange. Available equipment.

1. Horsepower and torque ratings based on premium fuel per SAE J1349® standard. Your results may vary. **2.** Horsepower and torque are independent attributes and may not be achieved simultaneously. **3.** 294 kW @ 5,500 rpm as per GSO testing standards.

Removal of doors for off-road use only. See Bronco Owner's Manual for detailed information.

RUNNING BOARDS

REINFORCED SWING GATE

UNIQUE RAPTOR
LED TAILLAMPS

37" ALL-TERRAIN TIRES
AND FULL-SIZE SPARE

ELITE OFF-ROAD HARDWARE

Starting with the Ford Bronco® frame foundation, the Ford Performance team developed the Bronco Raptor™ version with a focus on handling stability during high-speed desert runs. At the Raptor core is a fully boxed, high-strength-steel frame with new shock towers that increase wheel travel. Heavy-duty bash and skid plates provide driveline coverage from the front bumper to the back of the engine, transmission and transfer case. In the upper body, B-pillar crossbar and C-pillar reinforcement help torsional rigidity. Competition-level, Ford Performance-developed axles further deliver on the Ultra4 inspiration. There's a Dana 44 AdvanTEK® front-drive unit and a semi-float Dana 50 Heavy-Duty AdvanTEK rear axle that help provide sure-footed confidence.
