MEMORY MAKER

Lovers of the outdoors, memory makers want their children to have a childhood of outdoor memories, camping, adventure and everything in between. Soaking up all that nature has to offer. Where will your next memory be made?

MEMORY**MAKER**

This vehicle is fully equipped for an all-out family adventure and for new memories to be made. With all the ARB favourites – full frontal protection, side steps to assist all ages getting in and out, canopy with modular drawers for extra storage, kitchen for all those culinary delights and of course BP-51 suspension for a smooth ride.

SERIOUS OFF ROADER

The sooner they reach the dirt road, the better because that's when the fun begins. Rocks, rubble, dirt and the outback is where these wheels begin looking for the challenge, embracing it and, most likely, getting stuck in it. That's when the accessories take charge. A little bit of mud never hurt anybody.

SERIOUSOFFROADER

The Serious Off Roader is ready for anything a track can throw at it. With Recovery Points and Winch to ensure a swift recovery in any sticky situation, Under Vehicle Protection for when the going gets rough, an ARB HardLid to carry firewood, carry a swag or anything else you need handy. Nothing is too tough for this vehicle, with the ultimate ride in BP-51 suspension and ARB Air Locker to get you further.

SERIOUS TOURER

TIME WELL SPENT

You've got nothing but time. See the coast, head outback,
wherever your heart desires. Tour the countryside.

SERIOUSTOURER

The Serious Tourer wants to hit the open road and visit all the famous, and not-so-famous, tourist destinations all with caravan in tow. They are looking to keep weight down but also have the necessities to enjoy the nomad lifestyle for weeks at a time. The coast, the outback or a long vineyard lunch all await on this next adventure.

PROTECTION

Protect the front end of your vehicle with a winch-compatible ARB bull bar designed to give you the protection and confidence to explore any terrain.

4X4 ACCESSORIES

Summit MKII Bull Bar

Incorporates ARB's renowned multi-fold upswept and tapered wing design for optimum strength and approach angle. It features 60.3-millimetre outer frames and centre cross tube, high lift jack, aerial, light and winch compatibility and is fully compatible with the vehicle's original equipment and safety features.

Summit Sahara MKII Bull Bar

Sharing the core design elements with the Summit MKII, the Sahara series of bars also features either a polished alloy tube or a matte black tube with or without an LED light bar recessed into the top hoop further underlining ARB's commitment to fabrication excellence.

ARB SpartanBar

Using an impact-absorbing, resilient and incredibly durable polyethylene material, the SpartanBar features cutting-edge design and engineering that creates a bull bar offering unsurpassed levels of safety for both driver and pedestrian.

ARB StealthBar

The StealthBar provides an alternative tough aesthetic appearance without compromising on vehicle protection, at approximately 30% less weight than an ARB SpartanBar. Designed using the same cutting-edge polyethylene material and manufacturing process, these bars are now the only bull bar approved for use in Europe.

Commercial Bull Bar

The Commercial Bull Bar provides considerable frontal protection but achieves cost savings through a simplified manufacturing process. The split pan allows maximum air flow and multi-fold wings provide strength and maintains optimum approach angle.

Summit MKII Rear Step Tow Bar

To complement the vehicle, an ARB Summit MKII Rear Step Tow Bar has been developed to work with the original equipment lower tub step and provide valuable rear protection. Optional lower tub protection and rear eight-tonne rated recovery points have been developed to ensure the RSTB offers the ultimate protection and practicality without compromising style.

UNDER VEHICLE PROTECTION

When traversing over roads less travelled, the underbody of your 4WD is one of the areas most susceptible to damage. Protect your vehicle from dangerous rocks, ruts or logs with ARB's range of Under Vehicle Protection.

UVP (Under Vehicle Protection)
Providing an unrivalled safeguard for the underside of your vehicle, ARB's UVP is laser cut, press formed and folded to provide superior strength. Designed to the specifications of the vehicle, it minimises the risk of damage to most vital components of the vehicle drivetrain.

UVA (Under Vehicle Armour)
Made in Australia from durable and impact-resistant cross-linked polymer, ARB's UVA weighs a fraction of any steel aftermarket alternatives, gives greater coverage, is easy to install and remove for vehicle servicing, and is compatible with the OE bumper, as well as bull bars, and the recovery points.

SIDE PROTECTION

Designed to protect the doors and side sills of your vehicle, you won't be afraid when venturing off road with ARB Summit Side Rails and Steps.

Summit Side Rails and Steps
ARB side protection equipment acts as a shield for your vehicle's vulnerable side panels, protecting them from rocks and road debris frequently encountered during remote area travel. Made from 60.3-millimetre tubular steel and featuring an anodised aluminium tread plate. Available as rail and step, or step on its own.

RECOVERY

ARB's Recovery Points are your best friend off road, providing a safer connection point for all forms of winching or snatch recoveries while exploring 4WD tracks.

Recovery Points (Front Forged + Rear)

The ARB Recovery Point slot features a chamfered edge specifically designed to suit both soft and steel shackles. Developed to fit the vehicle with UVP, UVA or OE protection, each ARB Recovery Point is rated at 8,000 kilograms up to the maximum turn angle of the front wheels. Both left- and right-hand Recovery Points have been precision robot-welded and developed to allow for different set-ups of recovery equipment to suit each individual situation. As each point is rated at eight tonnes, the use of bridle straps is not required. Front Recovery Points are a forged construction.

WARN VR Evo 10-S Winch

WARN is known for being rugged, durable and reliable and when it comes to winching, these qualities are very important. The WARN VR Evo Winch offers fast line speeds with lower amp draw and is made with a bold tactical look giving your vehicle an aggressive style with premium recovery equipment. This winch features a synthetic rope and can pull up to 10,000 pounds.

Bushranger REVO 10S Winch

With low amp draw, high quality construction and a thermal overload sensor, the Bushranger range of winches combine value for money with reliable performance in any terrain. This winch features synthetic rope and can pull up to 10,000 pounds.

SUSPENSION

Get greater ride comfort and handling across all terrains with an Old Man Emu suspension system from ARB.

BP-51

Whether it's extended trips, off road 4WDing or tackling terrain, Old Man Emu BP-51 shock absorbers by ARB provide unrivalled performance, setting the benchmark for all driving conditions, thanks to their fully adjustable internal bypass system. The result is the holy grail of suspension performance: the ultimate comfort and control when you need it.

Nitrocharger Sport

Old Man Emu's world-renowned Nitrocharger Sport shock absorber has stood the test of time, constantly standing up to the conditions and demands of vehicle owners. The Nitrocharger Sport range utilises significant advances in key componentry and the latest in valving technology to provide tremendous improvements in ride, comfort and handling over all terrains.

GVM Upgrade

Whether you're carrying tools of the trade or packing up the 4WD for a year-long trip, your Next-Generation Ford Ranger can exceed the original GVM. Old Man Emu is pleased to have development underway for GVM upgrades, with more details expected to be available in the coming months.

STORAGE

With a style to suit every need, an ARB canopy is the perfect solution for storing anything from camping gear to tools while the ARB Sportlid offers secure and weatherproof storage for your gear, as well as functional load carrying capacity on the top.

4X4 ACCESSORIES

Ascent

The Ascent Canopy is ARB's feature-packed flagship canopy, offering the highest level of usability and vehicle integration in an ultra-premium design. With a raft of standard features including fully integrated central locking and push-button window switches, the Ascent is the solution for those who live an active lifestyle and want their Next-Generation Ranger to look just as good off road as it does in the parking lot.

Classic Plus

Building on the proven design of the Classic Canopy, the Classic Plus Canopy integrates a single, centralised, electronic handle rear door that incorporates keyless entry and slam-shut style operation. The Classic Plus Canopy maintains the popular Classic shell, available in a smooth finish and embodying the proven design and engineering of the Ascent Canopy's central locking system for the Next-Generation Ranger.

Classic

ARB's Classic Canopy has stood the test of time, offering unrivalled quality, practicality and affordability. With the option of a smooth or textured exterior, an ARB Classic Canopy is the perfect solution to increase the protected storage space of your utility vehicle. With a range of accessories available, including canopy-mounted roof bars and racks, the Classic Canopy has been tailored to suit the Next-Generation Ford Ranger.

Sportlid

The ARB Sportlid is a great option when it comes to enhancing the sporty styling of the Next-Generation Ford Ranger, while offering secure and weatherproof storage for gear, with superior protection against dust ingress, as well as functional load carrying capacity on the top.

STORAGE

Whether it be for a quick weekend getaway or long-haul, interstate adventure, maximise the versatility of your vehicle’s cargo space with an ARB Modular Drawer System. Configure to suit your needs while taking cargo and equipment organisation to a whole new level.

4X4 ACCESSORIES

HardLid
The rugged ARB HardLid is an aluminium slimline tub lid for those who want to keep their cargo secure and protected from the weather with added tough aesthetic appeal. The optional premium pack includes dovetail rails, central locking kit and interior light.

ARB Modular Drawer System
With the creation of tailor-made trim panels, ARB has set the perfect aperture for the deployment of a fully integrated drawer suite to fit seamlessly into the Next-Generation Ford Ranger. For added practicality, ARB has incorporated accessory switch bezel cut-outs, ideal for use with additional install kits, all while allowing for fitment with or without the tub liner.

BASE Rack
Ultra sleek, boasting a super low mounting profile and lightweight design, the BASE Rack provides unmatched simplicity, flexibility and personalisation for the Next-Generation Ford Ranger with a range of accessories for full customisation. The BASE Rack is available for fitment on the cab or the canopy of the vehicle.

Thule Evo Wingbar
These roof cross bars feature advanced aerodynamic TrailEdge™ design and reduced wind noise thanks to the WindDiffuser™ technology. These bars are 135 centimetres wide (other sizes available) and can carry 100 kilograms.

LIGHTING

Shine the light on the road ahead with a selection of driving lights to suit your driving style. Choose from a variety of options such as spot, flood or combination lights to suit your ideal set-up.

4X4 ACCESSORIES

ARB Intensity IQ

The unique four-optic design of the Intensity IQ lights provides virtually unlimited choice of light beams to suit any road conditions. Protected by a virtually indestructible polycarbonate lens and a die cast aluminium body with incorporated ducts to allow for air flow to maximise cooling.

Pre-set eight configurations on the controller, which can instantly be changed at the click of a button, or via LINX or an app.

ARB Intensity V2

Featuring 21 or 32 LEDs in Spot or Flood beam for the best use of light for your requirements. Protected against radio frequency and electromagnetic interference and has a virtually indestructible polycarbonate lens.

ARB Intensity Solis

The ARB Intensity Solis lights have 21 or 36 OSRAM LEDs and a unique dimming feature allowing five preset outputs to alter the intensity of light. The same indestructible polycarbonate lens on the V2, however the Solis have interchangeable red and black bezels making the Intensity Solis lights suit your aesthetic requirements.

Summit Sahara Tube Light

The integrated 20-inch light bar on the tube of the Summit Sahara Bar greatly improves visibility and durability. Featuring over and under voltage protection, thermal management, protection against radio frequency and electromagnetic interference and reverse polarity protection.

BASE Rack Light Bar

The 954-millimetre wide light bar has combo beam technology to provide excellent mid- to long-range spread as well as distance down the road. It has two bracket options for placement either in front or below the rack and is vibration and UV tested.

Bushranger Night Hawk VLI

Built with high output OSRAM/CREE LEDs, intelligent onboard monitoring of the LED temperatures and built-in transistor switch to alleviate complication wiring. The unique shape and low-profile design of these lights allows for diverse fitment to suit most customers.

CAMPING

Take your camping experience to the next level with a range of products designed to improve your trip. From keeping food fresh and drinks cold to getting some shade from the sun, these products are designed with campers in mind.

Elements Fridge Freezer

The Elements Fridge Freezer has a stainless steel exterior with anodised aluminium latches and protected placement of electrical connections making it capable of withstanding any weather conditions. The lid has a gas strut to allow two handed access to the contents. The touchpad features temperature control, low voltage cut-out and security lock. When the lid's open, you have full use of the touchpad but when it's closed, the adjustment is hidden to prevent unwanted changes. The lid can also be locked with a unique user-selected locking code.

ZERO Fridge Freezer

The ZERO fridge freezer features front and rear DC inlets providing more options when mounting, a front USB port for charging devices, a tough steel outer casing, carry handles with integrated tie-down points, wireless monitoring and control via a Bluetooth app, anti-condensation technology, an internal LED light for convenient access and a side-opening reversible lid.

Available in a range of sizes and single or dual zone.

Awning

ARB Awnings are made from 300gsm PU-coated poly cotton rip stop canvas that is waterproof and UV protected. It has anodised 25-millimetre aluminium poles with nylon cuff joints and anti-wear points. Pegs and reflective guy ropes are included. Awnings have a grey PVC case and can come with or without LED lighting.

Aluminium Awning

The awning itself has all the above features; however, this is housed in a black aluminium case providing a sleek, stylish look while protecting your awning.

Available in either Black or Silver.

Slide Kitchen

Featuring a three-burner stove, sink and ample bench space, ARB's fully freestanding Slide Kitchen can be set up in as little as 15 seconds, offering practicality for any tourer. Beyond being one of the most practical features for any 4WD, the Slide Kitchen also boasts an innovative user-friendly design.

Auxiliary Battery Kit

Offering an independent power source for items such as fridges and camp lights, an auxiliary battery system offers peace of mind and powers additional accessories without the risk of flattening the main battery. The Auxiliary Battery Kit is designed to be fitted in the engine bay and is supplied with a battery tray, mounting hardware, plug-and-play wiring loom and a REDARC BCDC charger.

AIR SYSTEMS + LOCKER

ARB’s world-class Air Locker systems will take you anywhere you choose to go, coupled with our globally used, best-in-class air compressors.

Air Locker
ARB Air Locker locking differentials allow you to tackle the toughest terrain with confidence. As the world’s premium selectable locker, and the locker of choice for gruelling 4WDers and rock racers throughout the world, ARB Air Lockers will keep you moving regardless of the conditions. ARB Air Locking differentials directly replace the front OE differential of the Next-Generation Ford Ranger.

Universal Coupling Mounting Bracket
This coupling mounting bracket is deep recessed providing protection and reduces front damage to the Air Coupling. It’s textured black and allows easy fitment into many existing plastic trim panels in modern vehicles or can integrate into existing or new drawer systems.

Twin Air Compressor Kit
The ARB Twin Air Compressor has a class-leading flow rate and is constructed of lightweight, high-grade materials that allow for fast tyre inflation, Air Locker activation and a range of other functions. Also available is an engineered bracket system to smoothly integrate an ARB Air Compressor without compromising on space. Designed to be discreetly mounted in the right rear fender of the Next-Generation Ford Ranger, the ARB Twin Air Compressor Kit allows for the entire tub to remain free for drawers or other accessories.

Air Tank
Ideal for use with ARB’s on-board compressors, the four-litre Aluminium Air Tank delivers high-volume air output suitable for rapid tyre inflation and running most powered air tools. Featuring forged aluminium end caps, it offers flexible mounting with four 1/4NPT ports with two JIC-4 male fittings to suit different vehicle set-ups.

Pump Up Kit
This kit allows quick inflation of tyres when used with an ARB compressor. The air hose is seven metres in length and is made from a durable material sourced from Japan. The Air Coupling has been designed to prevent air leaks and includes a dust cap. The Tyre Inflator Chuck is designed to be a quick connect and disconnect head. It securely grips the tyre valve preventing leaks and the need to hold it in place.

ELECTRICAL

Adding additional lighting options such as driving or auxiliary lights will require electrical components to connect and control them. ARB’s range of specific solutions is there to help.

Wiring Loom (Ranger-Specific Solis Driving Light Harness)
For the Next-Generation Ford Ranger, ARB has designed a plug-and-play wiring harness to connect into ARB Solis and Intensity driving lights, offering seamless integration into the ARB bull bar and electrical system.

Patch Loom (Non-ARB Bar Fitment)
ARB has created a universal plug-and-play patch loom that provides a clean high-beam signal output for the Next-Generation Ford Ranger and suits applications such as non-ARB bar or light fitment and the fitment of roof rack front-facing lights.

LINX Vehicle Accessory Interface
LINX is a unique modern controller that declutters the dashboard and centralises the command of vehicle accessories by replacing classic switches, gauges and monitors with one sleek and smart driver interface. Built on an expandable platform, LINX will continue to evolve your on and off road driving experience both now and into the future.

LINX A-Pillar Bracket
To complement ARB’s LINX Vehicle Accessory Interface, the LINX A-Pillar Bracket mounts the LINX display screen in a safe and easy-to-reach location specific to the Next-Generation Ford Ranger. Utilising the LINX mount, the display can be orientated to the desired position so each time the display is returned to the vehicle, it’s always in the optimal position.

OFF ROAD ESSENTIALS

Always take the scenic route with a range of products to help you stay off road, for longer.

Frontier Long-Range Diesel Tank
Made in Australia from durable and impact-resistant polymer material that's designed to flex with the vehicle's chassis, the ARB Frontier Long-Range Diesel Tank provides a significant upgrade to the Next-Generation Ford Ranger OE fuel tank, allowing 140 litres to be carried.

Safari V-Spec Snorkel
Utilising Safari's traditional design concepts and incorporating the very latest in scanning and CAD design software, Safari's V-Spec Snorkel for the Next-Generation Ford Ranger is ready to perform in the most extreme environments, protecting the vehicle's engine against water, dust and snow ingress while delivering cool, clean air.

Tailgate Assist
The perfect solution to the struggle of lowering and raising the Next-Generation Ford Ranger's heavy tailgate, ARB's Tailgate Assist safely controls the opening speed and reduces the effort required to close while enabling simple, one-handed operation.

BASE Rack Roller
Loading pieces of timber and other heavy items onto your BASE Rack will be much easier with this useful accessory. Available in two sizes to suit the standard and narrow racks and can be attached to any section of dovetail around the outer perimeter of the rack.
